

# TOTAL UTILITIES

## 100% RENEWABLE CERTIFICATES

Total Utilities independently sources renewable energy certificates tailored to each client, helping New Zealand businesses reduce emissions, control costs, and transition to cleaner energy.

Our core expertise is in:

- Independent sourcing of renewable energy certificates
- Sourcing RE100 compliant certificates
- Assisting businesses meet their 100% renewable targets

## INTEGRATED SOLUTIONS

### Independent Broker

Total Utilities is an independent broker of renewable energy certificates sourcing direct from generators.

### Renewable Energy

Secure RE100 compliant renewable energy certificates and allow your business match energy usage with renewable generation.

### Carbon Reporting

Reporting net carbon zero electricity usage in Greenhouse Gas Reporting programmes by using Renewable Energy Certificates.

## PROVEN SUCCESS

### International Retail Company

**Achieved its 100% renewable target**  
despite its energy supplier not providing renewable certificates.

### Lodestone Energy

#### Developing Solar Farms

Through REC purchases, our clients directly support renewable growth.

### Global Hearing Specialist

#### Simplified settlement

to our client's reporting period, not the standard carbon year.

## We Help You

Independently source renewable energy certificates that meet RE100 guidelines. By purchasing New Zealand Energy Certificates you can claim the energy you consume is matched with 100% renewable resources.

### REC Procurement

#### *Traceable Renewable Energy*

As an independent REC broker via BraveTrace, we secure verified Energy Attribute Certificates to match your electricity use with 100% renewable sources—ensuring full traceability back to generation.

### RE100 Compliant

#### *Certified Renewable Standard*

We source RE100-compliant certificates that are verified from New Zealand-based generators with assets under 15 years old that meet strict sustainability standards.

### Renewable Generation

#### *Fueling New Zealand*

Hydro is the primary source of certificates, as it's New Zealand's largest form of renewable generation, with additional certificates also coming from wind, geothermal, solar, and biomass.

### BraveTrace

#### *Accelerating Renewables*

BraveTrace operates the New Zealand Energy Certificate System (NZECS), issuing and managing energy attribute certificates that verify the renewable origin of the electricity or gas an organisation purchases.

### Settlements

#### *Aligned to your Business*

Total Utilities can streamline the process by settling RECs within your financial year, something energy retailers typically can't do, making budgeting and admin far easier for your business.

### Utility Insights

#### *Measure. Monitor. Minimise*

Centralise your electricity, natural gas, LPG, waste, water, and fuel data to monitor consumption, costs, and carbon—identify savings through advanced analytics and keep on top of budgets.
