

# TOTAL UTILITIES

Total Utilities empowers New Zealand businesses to build long-term financial resilience through smart, future-focused energy management. Since 1999, we've helped businesses reduce costs, cut emissions, and move to cleaner energy.

Our core expertise is in:

- Securing competitive contracts and managing market risk
- Independent sourcing of renewable energy certificates
- Analysis of consumption patterns and energy-use trends.

## INTEGRATED SOLUTIONS

### Energy Procurement

Secure the best electricity, natural gas and LPG contracts with our market expertise and strategic sourcing.

### Renewable Energy

Secure renewable energy certificates and onsite solar solutions that are independently sourced, expertly vetted, and tailored to you.

### Energy Reporting

From baseline assessments to performance and ongoing reporting, we're with you every step of the way.

## PROVEN SUCCESS

### Food Production

**Energy savings of \$1m per year**  
negotiated through innovative supply contracts.

### Horticulture Company

**Solar savings of \$380k per year**  
from 1.4MW of onsite solar with an ROI of 6 years.

### National Retail Group

**Energy waste of \$290k per year**  
identified through out of hours energy usage analysis.

# We Help You

Lower energy costs, reduce risk, and secure competitive contracts tailored to your business. Total Utilities combines deep expertise with data-driven insights to deliver clear visibility and empower smarter decision-making.

## Electricity Procurement

### *Intelligent Market Navigation*

Total Utilities helps businesses secure competitive electricity supply by analysing retailer offers, market conditions, and network pricing structures. We work with power purchase agreements, wholesale and fixed contracts.

## Natural Gas Procurement

### *Risk-Smart Contracting*

Total Utilities helps you manage price risk by negotiating contracts that balance cost efficiency with security of supply. For larger users we can offer unbundled gas supply proving more flexible options than traditional gas supply agreements.

## LPG Procurement

### *LPG Made Easy*

We provide independent advice and negotiation support to secure competitive pricing, comparing supplier quotes for asset replacements with and without capex recovery to give you complete cost transparency.

## Energy Attribute Certificates

### *Renewable Energy*

As an independent REC broker via BraveTrace, we secure verified Energy Attribute Certificates to match your electricity use with 100% renewable sources—ensuring full traceability back to generation.

## Power Purchase Agreements

### *Price Certainty*

By sourcing PPAs that link you straight to renewable generators, Total Utilities delivers 100% renewable energy and long-term stability at generation-cost pricing—usually well below market rates.

## Utility Insights

### *Measure. Monitor. Minimise*

Centralise your electricity, natural gas, LPG, waste, water, and fuel data to monitor consumption, costs, and carbon—identify savings through advanced analytics and keep on top of budgets.
